

Chickenpox

Definition:

A highly contagious viral infection causing itchy skin rashes.

Symptoms:

- Fluid-filled blisters
- Fever and body aches

Risk Factors:

- Lack of vaccination

Home Remedies:

- Oatmeal baths
- Calamine lotion

Medical Remedies:

- Antiviral medications (Acyclovir)

Prevention:

- Chickenpox vaccine

Consult a Doctor if:

- Skin lesions become infected

Fun Facts:

- The virus remains dormant and may cause shingles later.
